

## Messages from the road for a safer and smarter future

SAFE STRIP Final event and demonstration

# SAVE THE DATE

23 April 2020

Holiday Inn Athens Airport - Athens, Greece

European project SAFE STRIP has developed an innovative technological solution enabling C-ITS applications through low-cost integrated smart strips on existing road infrastructure (optional). After almost 3 years of work and several pilot trials on European roads, the SAFE STRIP partners are inviting you for a day of exciting showcases followed by a high-level panel discussion with project participants, public authorities and road operators. The participants will also have the opportunity to see a demo at the Attiki Odos highway – SAFE STRIP's Greek pilot site. More information and draft agenda will follow soon.

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement number 723211.
