

Messages from the road for a safer and smarter future

Virtual final event and live demonstration

SAVE THE DATE

20 July 2020

Holiday Inn Athens Airport - Athens, Greece

[Click here](#) for information on the virtual event

European project SAFE STRIP has developed an innovative technological solution enabling C-ITS applications through low-cost integrated smart strips on existing road infrastructure (optional). After almost 3 years of work and several pilot trials on European roads, the SAFE STRIP partners are inviting you for an interactive virtual event with a high-level panel discussion with project participants, public authorities and road operators and real-life demos. The participants will also have the opportunity to see a demo at the Attiki Odos highway – SAFE STRIP's Greek pilot site.

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement number 723211.
